## EXTERIOR

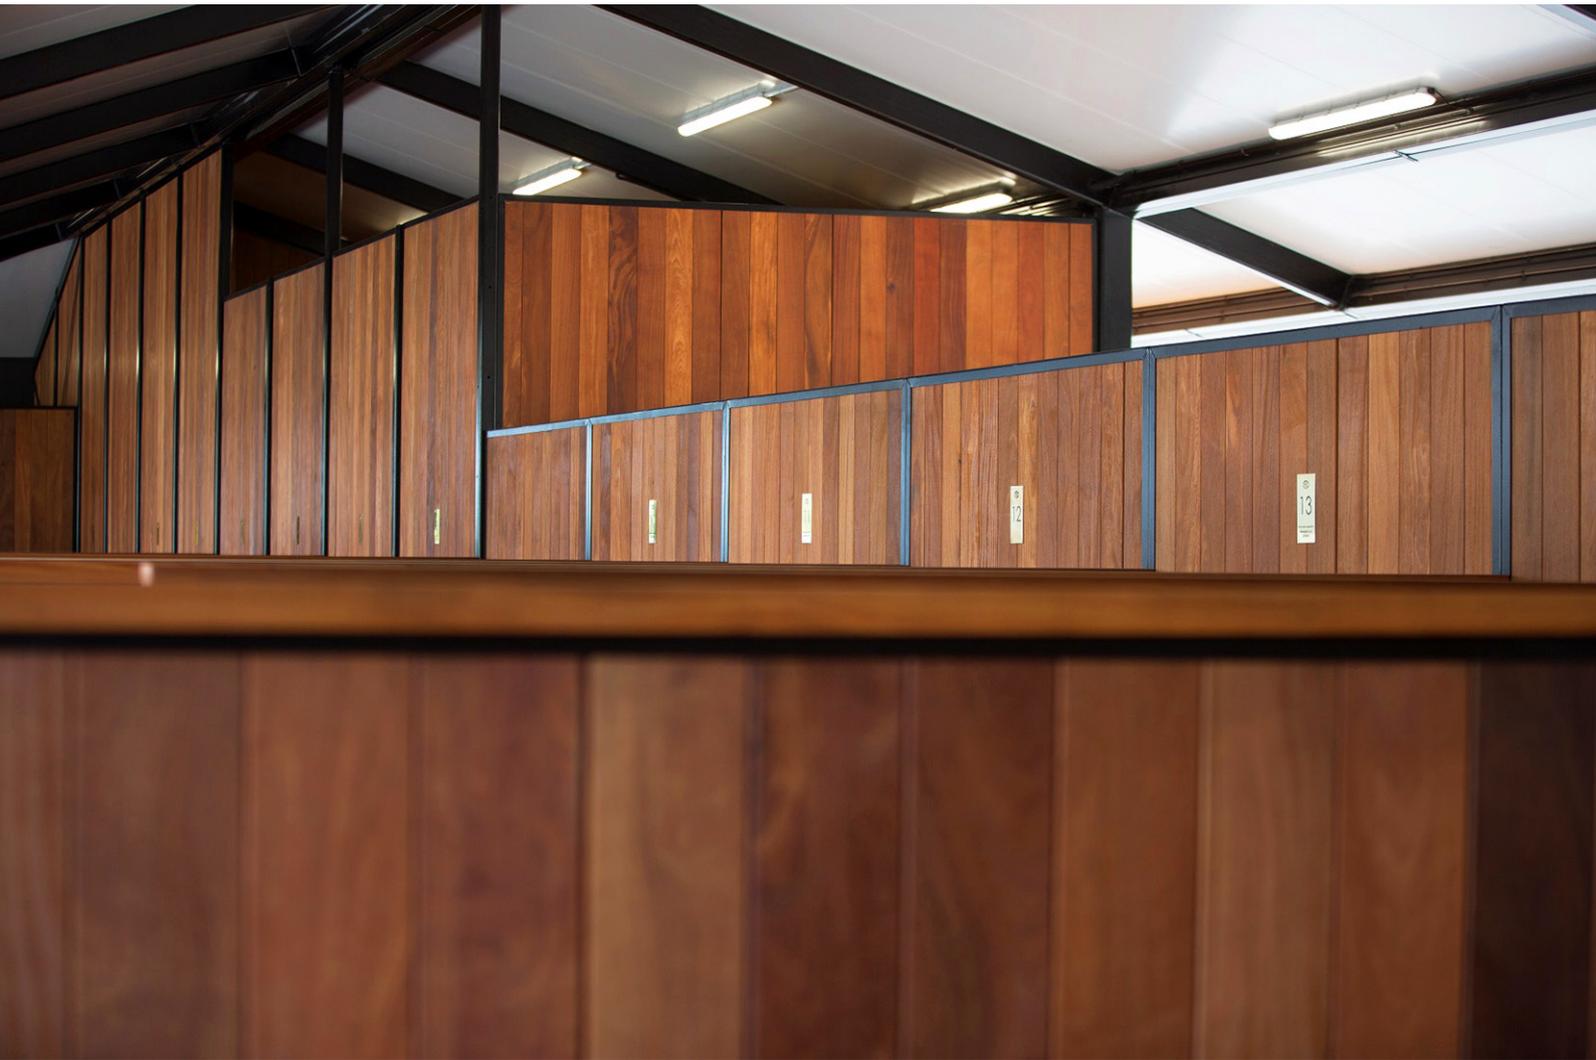

WOCA Exterior Oil is a natural treatment for new and previously-oiled outdoor wooden surfaces such as cladding, decks, fences and outdoor furniture. It is a penetrating oil with strong UV protection that creates a water and dirt-repellent surface, preventing the growth of mould and fungus. The natural product ensures a safe and healthy environment for the racehorses at Ellerslie Racecourse, whilst enhancing the natural colour and grain of the Cumaru wood, supplied by JSC Timber.

WOCA EXTERIOR OIL BANGKIRAI  
CUMARU WALLS

---

- Natural, sustainable and eco-friendly
- Water-based, vegetable oil components
- Very low VOC (maximum 20g/L)
- 100% penetrating oil, no flaking or peeling
- Delays mould and mildew growth
- Easy to maintain
- Fast drying time of 24 hours
- Available in 11 colours

## APPLICATION PROCESS

### WOCA EXTERIOR OIL

---

1. Stir oil before use. Using a brush, apply a thin and even coat to the clean, dry surface.
2. Wipe off excess product with a clean cotton cloth after no more than 5 minutes, ensuring the removal of oil from joints and grooves.
3. Repeat steps 1 and 2, applying a second coat to the timber.
4. Once the wood is dry, polish with a polishing machine for an extra hard-wearing surface.

*The wood will be dry after 24 to 48 hours, depending on weather conditions.  
Do not expose to water during this time.*
