

Project of the Month.

April 2019.

REAL ESTATE OFFICE
WAIHEKE ISLAND

I have a very simple philosophy in life and that is, if it's worth doing, it's worth doing properly. So, when it came to recoating the cedar on our building, the only choice for me was WOCA Denmark's Exterior Oil. The building, being in such close proximity to the ocean and exposed to direct sunlight, required a high-quality, durable finish. And because it is such a fast-drying product, the application process was fast and simple, meaning minimal disruption to our business.

MATTHEW SMITH
Principal / Ray White Waiheke

EXTERIOR

Ray White on Ocean View Road, Waiheke Island, is exposed to a lot of direct sunlight and salty sea-spray. For their refurbishment, WOCA Exterior Oil was chosen to protect and enhance the cedar cladding. The surface was first cleaned and prepared with WOCA Exterior Cleaner, which removed all the silvered dead timber and what remained of the existing finish. This created a fresh timber surface, ready for the Exterior Oil.

WOCA EXTERIOR OIL GREY

CEDAR CLADDING

- Water-based, vegetable oil components
- 100% penetrating oil, no flaking or peeling
- Very low VOC (maximum 20g/L)
- Delays mould and mildew growth
- Natural, sustainable and eco-friendly
- Strong UV-protection
- Fast drying time – 24 hours
- Suitable for all exterior timber surfaces (new and previously-oiled)

APPLICATION PROCESS

EXTERIOR OIL

1. Stir oil before use. Using a brush, apply a thin and even coat to the clean, dry surface.
2. Wipe off excess product with a clean cotton cloth after no more than 5 minutes, ensuring to remove oil from joints and grooves.
3. Repeat steps 1 and 2, applying a second coat to the timber.
4. Once the wood is dry, polish with a polishing machine for an extra hard-wearing surface.
5. *The wood will be dry after 24 to 48 hours, depending on weather conditions.
Do not expose to water during this time.*
