

Project of the month.

August 2018.

The background of the page is a photograph of a wooden workbench in a toy workshop. On the bench, there are various colorful wooden toys, including a red and green toy car, a blue toy car, and a green toy figure. A red string is draped over the edge of the bench. The lighting is warm and natural, highlighting the textures of the wood and the vibrant colors of the toys.

The Toy Maker's Cottage.

PRESCHOOL
PHOTOGRAPHY: MOHINI MANU

Caron Michael, owner and operator of The Toy Maker's Cottage, desired a natural timber finish that would be safe and healthy for children at her preschool. She wanted to lighten the native-timber floors of her renovated cottage, built in the 1800's, as well as protect the handmade wooden toys. WOCA natural oils ensure safe application that Caron herself easily applied to the toys, furniture, cabinetry and even the floors; the result – an environmentally friendly and healthy indoor climate for the children. And because WOCA is a penetrating product, the protection saturates deep into the wood, providing a strong water and dirt-repellent surface, able to withstand all that children throw at it.

INTERIOR

WOCA Diamond Oil is a fully penetrating product that leaves a natural and honest representation of timber. The benefits are also in what cannot be seen – the ingredients in Diamond Oil are derived from vegetable oil components, so it is eco-friendly and non-harmful for an everyday living environment with children and pets.

WOCA DIAMOND OIL WHITE RIMU & MATAI FLOOR

- Vegetable oil based – truly sustainable
- No VOC
- Ingredients independently certified by the German Biological Building Institute (IBR)
- One application, fast-drying oil
- 100% penetrating oil, not film-forming
- 99% solid content
- Suitable for all interior timber surfaces

FURNITURE & CABINETS

APPLICATION PROCESS

WOCA DIAMOND OIL

1. Apply WOCA Wood Cleaner, diluted 1:40 with water, to the clean, dry surface.
2. Apply Diamond Oil to the surface sparingly using a speed brush or roller. Allow the product to penetrate.
3. After 20 minutes, rub the oil into the wood with a cloth, nylon pad, or 360° gib tool.
4. Remove all excess from the surface with a clean cloth.
5. Dispose of cloths in a plastic bag containing water to avoid self-combustion.

The wood will be dry after 48 hours, and fully hard after 7 days.

Clean and maintain with WOCA Natural Soap, diluted 1:40.

EXTERIOR

WOCA Exterior Oil is a natural treatment for new and previously oiled outdoor wooden surfaces. It provides a strong water and dirt-repellent surface, preventing the growth of mould and fungus, which makes it ideal for use around children. The fast-drying oil provides UV protection, and enhances the natural colour and grain of the Vitex.

WOCA EXTERIOR OIL NATURAL VITEX DECK

- Water-based, vegetable oil components
- Natural, sustainable and eco-friendly
- Low VOC (maximum 20g/L)
- Delays mould and mildew growth
- Fast drying time – 24 hours
- 100% penetrating oil, no flaking or peeling
- Suitable for decks, cladding and furniture
