If your sofa is going to be the centrepiece of your home, shouldn't you have it exactly as you want it?

# Every couch from Eilersen is built by hand. We encourage you to take advantage of that.

Make it bigger or smaller. Choose a softer pillow, change the fabric, or adjust the width. With My Eilersen, you can customize your couch to match your mood and temperament. If it's going to be the centrepiece of your home, shouldn't you have it exactly the way you want it?

The Greeks invented the golden section, but few modernist furniture makers have taken it further. Every couch in this catalogue is built on the same principle of square, one and a half square and double squares. Because nothing says Eilersen more than those smooth, wide, low lines.

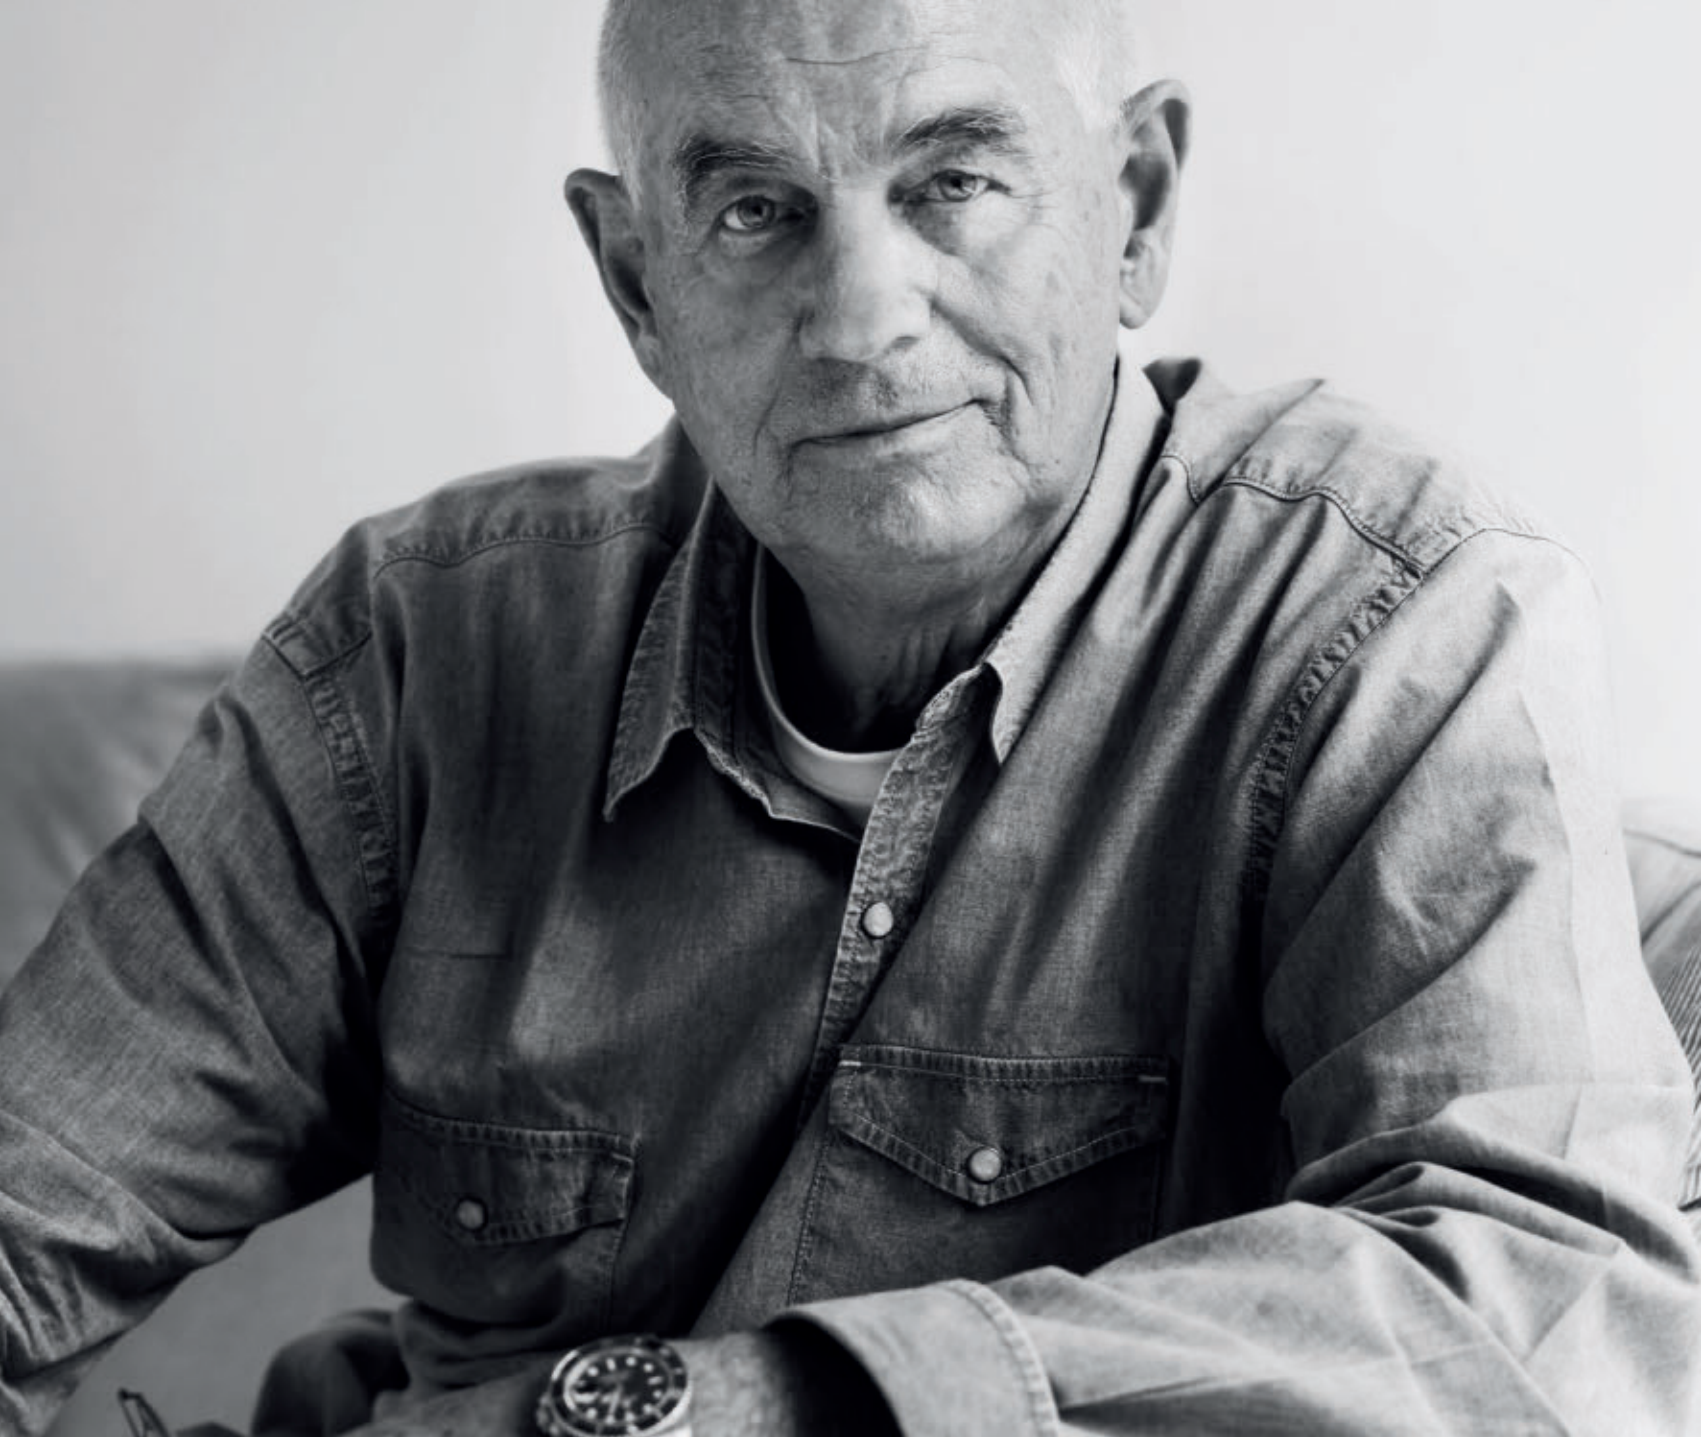

Our look and feel may seem international, but the inheritance is downright Scandinavian.

Skilled hands and first-rate materials combine to create the ultimate in upholstered furniture. We Scandinavians like our pinewood to grow slowly for a minimum of tension. We like adhesives to be water-based and our springs to stay fit and non-creaking. We even have standards for the uniformity of staples and threads.

To obtain an  
Eilersen is to enter a  
lifelong relationship.

You are what you seat

11

## Every most single design in our range of couches carries his signature.

With the simplistic, yet sophisticated Baseline, Jens Juul Eilersen struck a cord with people who make sense of proportions. Being third generation in a family of craftsmen is not a bad luggage, if you aim to change the common perception of how a couch should look and feel.

Once upon a time, in a kingdom by the sea, there lived a young man, who was unusually good with his hands.

In spite of his modest age, he had known all his life that one day he would show the world what those hands were capable of. Niels Eilersen was his name, and this was his plan: “I’m going to build a coach, but not just any coach. I will build a hunting wagon, and it is going to be the lightest and the strongest and the most manoeuvrable in the county.”

Young Niels built his hunting wagon, and people travelled from outside the county to admire it. And though he did not own a horse to put in front of it, his coach became the start of a business that would grow into a dynasty. The year was 1895, and four generations of Eilersen have since toiled to keep up with Niels' aspirations. Focus may have changed from coaches to couches, but ambition still strives.

When you put your heart into it, you might just build the best sofa in the world.
